Automatic 183 Colorado 15CAMPBELL SPEAKS
ON DRY FARMINGScience Has Revolutionized
the Pursuit of Farming in
the Great West.

THE ART OF PLOWING EXPLAINED

Prof. H. W. Campbell, father of the "Campbell system" of dry farming, lectured to the students at the Agricultural college, Fort Collins, Colo., last Saturday morning on the science of farming successfully without irrigation. In brief, Mr. Campbell said:

"Ten years ago very few of us realized that it made any difference when the soil was tilled. We thought that everything depended upon the season. We have, by systematic study and observation, found out many things about farming, and we have advanced enough to say that we know what to do, when to do it and what results we may expect. Drouths of course, have their effect, but we know how to minimize damage from this source."

"After all, the farmer is the corner stone upon which the business structure rests. Ten years ago there were almost total crop failures all over the west. People did not know what to do nor where to go. Business was at a complete standstill, merchants bought little because they knew the farmer could not turn purchase but little, and this was because the farmer raised nothing and had no money to pay old debts with, let alone buying new goods. The manufacturers had their men on half time, railroads were transporting little, and in short, business generally was in a chaotic condition. The farmer is now growing four blades where he formerly harvested one blade, and a poor one at that, and as a result, business is good everywhere and values have increased, and it is not because of a 'boom' but because we are just beginning to realize the intrinsic value of our agricultural land."

"Scientific farming, which just now is doing so much toward the reclamation of the raw prairie land of the west, is not confined to the simple question of deep plowing, subsurface packing or frequent shallow cultivation. There are conditions on every farm that must be considered separately. Generally speaking, the ground should not be plowed when it is dry. There should be some moisture. When the soil is moist it readily breaks apart. The plow should be immediately followed with the subsoil packer and this settles the soil firmly. Follow next with the Acme harrow, and the ground is a fine condition, which enables it to hold moisture, to increase the power of capillary attraction, and it also facilitates root growth."

"Chemical composition of the soil is not everything. Equally important is the physical condition, by which the plant food is made available, and by which we can control the water and the air. The air in the soil is just as important as the water in growing a crop. This fact we have demonstrated on our farms in Nebraska and Kansas. There is a bright outlook for young men who take up farming as a business, but if you succeed you must be up to date in your methods. You have at this college an opportunity to form correct ideas of live stock production, crop culture, and in short, you take up farming after your course here, you are a hundred times better prepared than those of us who have for years been studying the science of farming."

DIED IN SAN DIEGO.

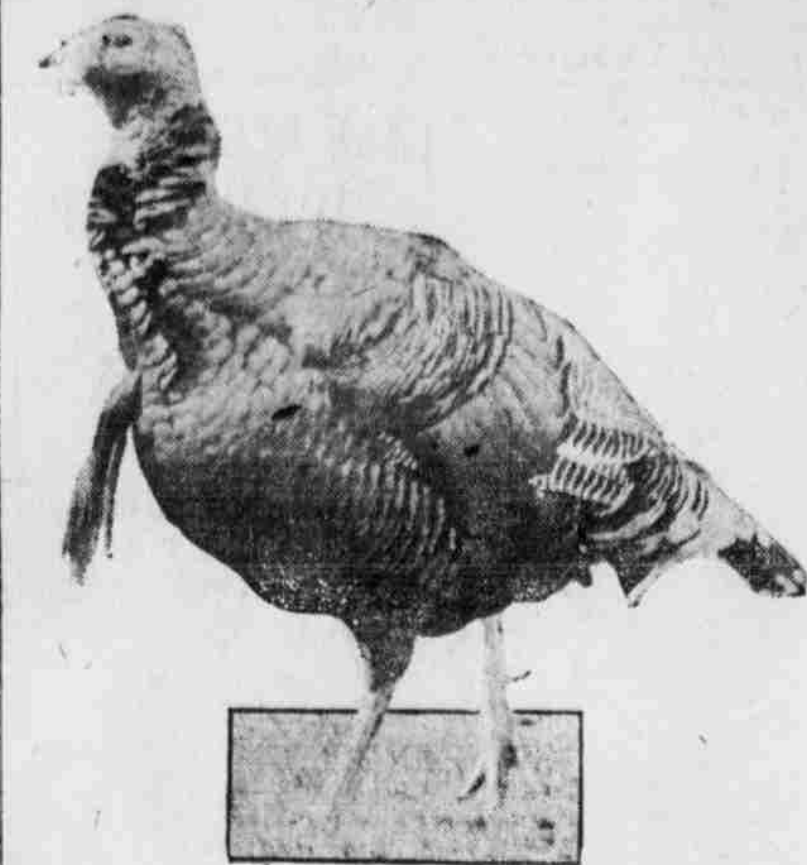

Socorro mourns the Death of Mrs. W. H. Sanders.

The sad announcement came to Socorro the other day that Mrs. W. H. Sanders, wife of one of Socorro county's leading stockmen and best known citizens, had died in San Diego, Cal., says the Chieftain. Mrs. Sanders, known here of the circumstances of Mrs. Sanders' death, other than that she submitted to a dangerous surgical operation for relief from a disease which she had suffered for several years, and that she survived the operation only a few minutes.

Mr. Sanders and other members of the family will have the hearty sympathy of a large circle of relatives and friends in their bereavement.

WORTH TRYING.The President's
Thanksgiving Turk

HOW 41 POUND BIRD FOR WHITE HOUSE LOOKS IN LIFE.

Westerly, R. I., Nov. 28. — The turkey President Roosevelt and his family will eat on Thanksgiving day is primed and ready for the hatchet, weighing 41 pounds.

The big gobble's name is San Juan. He stands nearly four feet tall, and here's a photograph taken of him on the farm. As usual, he is the gift of Horace Vose, who has supplied White House Thanksgiving turkeys since the

HOVEY ANSWERS
ALGODONES WRITERRELATIVE TO SCHOOL MATTERS
IN THAT DISTRICT OF SANDOVAL COUNTY.

To Evening Citizen:
Algodones, N. M., Nov. 28. — In the columns of your most esteemed paper of the 20th inst., there appears a paragraph headed "Algodones Items" as special correspondence, under date of Nov. 16th, 1905. In answer to said article, which I consider a slander from the man who wrote same, I desire to say furthermore that I defy Mr. J. H. Madden to prove his assertions. First he has basely and falsely lied, inasmuch as saying that no school has been held in Algodones, as the school has been in session since the 6th inst. The writer of these lines being in charge of the school, with an attendance of 54 school children of this place, now if the writer of the said slanderous article has been killing ducks or geese in his frequent nightmares, I am not to blame for his ignorance in our precinct affairs. Now with regard to the school director to whom he refers as a man "illiterate" and who was re-elected this year, school director, I beg leave to say that the people of this precinct simply showed the fact that they have all confidence in the man referred to, who is a man of family, who has three or four children of school age. He is owner of personal property, of a very real estate, a tax-payer and an honest straight-forward gentleman. He further refers to four Americans of this place having cast their votes for him to their shame; what does he call the rest of the men who voted for him? The re-election of Mr. Pedro Lobato does not suit Mr. J. H. Madden, it is very immaterial to us. Mr. J. H. M. has neither family, home, or country, has never contributed with a single cent towards taxes or towards schools, nor even paid his poll tax. Therefore I consider that his interest in school affairs is a very small one; on his part it shows that he is a most ungrateful man, as he has always received nothing but kindness at the hands of the Spanish American residents of this precinct, who have fed him, roomed him and cared for him in his rooming. If he is trying to pose as a writer, or working up a story, he has started the wrong way and these people are ready to stand by their rights and are better and more of American citizens than he is himself. Yours respectfully,
O. P. HOVEY.

CONTRACTORS, ATTENTION.

Proposals or bids for the construction of a two-story brick business building, with cellar, stone foundation, of 50x80 feet, are solicited. Bids will be received until December 5, 1905, at 10 a. m., the architect reserving the right to reject any or all bids. Plans and specifications can be had by applying to G. Palladino, architect, 331 North Fourth street.

CEMENT FACTORY

PLANNED FOR ESTABLISHMENT
NEAR ROSWELL IN PECOS VALLEY.

A dispatch from Roswell dated November 25, says: A large cement factory will be built on the Pecos river near this city, and will be under operation by January 1. At the start, 100 men will be employed. The plant will be built by the Acme Cement company, which is one of the foremost of the country. It has five mills: one at Laramie, Wyo., one at Grand Rapids, Mich.; two in the Indian Territory and one at Acme, Texas. These factories have a daily output of 1,800 tons, but the company is now 15,000 tons behind in its orders.

The plant here will be a "six-kettle" mill, which will have a capacity of 150 tons per day. The cement here will be made from gypsum, a bed of which at the point where the factory will be located, has been pierced for forty feet, and the bottom is still undiscovered. The gypsum is almost pure. The gypsum is plowed up, ground, and "dry-balled" in large kettles. The intense heat is applied until all but from 5 to 7 per cent of the moisture is removed. It is claimed that this makes a perfect cement for use in plastering and white-coating. The cement will not be used in building walls.

Experts declare that the gypsum beds on the Pecos river are the finest in the world.

CHEAP RATES OVER
THE SANTA FE ROAD

Chicago Live Stock Show.
Every stockman needs the inspiration and benefit of the International Live Stock Exhibition. Will be held in Chicago, Dec. 16-23, '05. Arrange your plans to include a trip to Chicago for this event. Tickets on sale Dec. 16 to 19, inclusive. Special rate of \$45.00, via Santa Fe. Agent,

PAINFUL PERIODS
AMERICAN WOMEN FIND RELIEFThe Case of Miss Irene Crosby by One
of Thousands of Cured Made by Lydia
E. Pinkham's Vegetable Compound.

How many women realize that menstruation is the balance wheel of a woman's life, and while no woman is entirely free from periodical suffering, it is not the plan of nature that women should suffer so severely.

Thousands of American women, however, have found relief from all monthly suffering by taking Lydia E. Pinkham's Vegetable Compound, as it is the most thorough female regulator known to medical science. It cures the condition which causes so much discomfort and robs menstruation of its terrors.

Miss Irene Crosby, of 313 Charlton Street East Savannah, Ga., writes: "Lydia E. Pinkham's Vegetable Compound is a true friend to woman. It has been great benefit to me, curing me of irregular and painful menstruation when everything else had failed, and I gladly recommend it to other suffering women."

Women who are troubled with painful or irregular menstruation, backache, bloating (or flatulence), leucorrhea, falling inflammation or ulceration of the uterus, ovarian troubles, that "bearing-down" feeling, dizziness, faintness, indigestion, nervous prostration or the blues, should take immediate action to ward off the serious consequences, and be restored to perfect health and strength by taking Lydia E. Pinkham's Vegetable Compound, and then write to Mrs. Pinkham, Lynn, Mass., for further free advice. Thousands have been cured by so doing.

WILLING HELPERS.
What's the use of a helper, if he isn't willing? Willingness is an ample mantle which will absolve most cover all the sins of service. But a classified advertisement in The Evening Citizen is a willing helper that is not only absolutely competent, but also is a willing worker. It works all the time for you. It is the best and most economical publicity in the world.

Every Ounce You Eat.
Every ounce of food you eat that fails to digest does a pound of harm. It turns the entire meal into poison. This not only deprives the blood of the necessary tissue-building material, but it poisons it. Kodol Dyspepsia Cure is a perfect digestant. It digests the food regardless of the condition of the stomach. It allows that organ to rest and get strong again. Relieves the Belching, Heart Burn, Sour Stomach, Indigestion, Palpitation of the Heart, etc. Sold by all druggists.

A GAS HEATER

is a boon to the household.

There are, of course, logical ones: Economy, comfort, no dirt, no bother, no worry, and always ready, heat where and when you want it by the striking of a match. Turn off the gas and the expense stops. You can't do that with a furnace. Try a gas heater for a morning and evening tonic and see if they are not worth while. A telephone message, a card or a visit will start the gas heater homewards.
